

Sprint 1 Report

Product Name : UpToDate

Team Name: UpToDaters

Release Name : UpToDate

Release Date : 3/19/18

Revision Number : 1

Revision Date : 2/3/18

Actions to stop doing:

- We want to stop switching between frameworks because we were switching from web2py to the MEAN Stack and now to Flask. This put us a bit behind schedule, but now that we've talked to the TA and agreed on a framework to use, we will be able to start making a lot more progress.

Actions to start doing:

- We want to start scheduling more meetings so it's easier to keep track of the work everyone is getting done.
- We want to be more accurate with estimating work tasks since we underestimated the time for some of the tasks in this sprint.
- We want to set aside more time for group work sessions since we tend to get more work done together.

Actions to keep doing:

- We want to keep communicating with each other over Discord so that we can stay updated on our progress or answer each others questions.
- We want to keep completing our assigned sprint tasks in a timely fashion.

Work Completed:

- We created a centralized homepage (User Story #2)
- We designed a front-end to display the content (User Story #2)

Work Not Completed:

- We did not create personal accounts for users to log in and sign up because we decided that it wasn't a necessary feature needed for users to access our application (User Story #1)

Work Completion Rate:

Sprint 1 Completion Rate: All 2 user stories were completed

Task Listing(11 hours)

- User Story 1: As a user, I want to familiarize myself with Python and prepare myself enough to code a project comfortably in this language (7 points)
 - Read tutorials and watch videos to familiarize self with Python (5 hours)
Extended by 1 hour
- User Story 2: As a user, I want to have a centralized homepage (7 points)
 - Design a front end page where content will be displayed(3 hours) **Extended by 1 hour**
 - Connect frontend user input to backend (3 hours) **2 hours less**

The number of working days for the past sprint was 6 days.

average user stories/day: $\frac{1}{3}$ user stories per day

average ideal work hours/day: 1.8 work hours per day
